CTA End-To-End Journal

Trail Section: Section 22, Bolton to Trapp

Date: February 24, 2010

Weather: Bluebird day, no wind, 25 degrees. Perfect weather for a ski tour in the Vermont mountains.

Group Members: Huey, Duey, and Louey

Trail Conditions: *Please report any trail maintenance needs to the CTA office at 802-864-5794 or info@catamounttrail.org*

8" of fresh powder on a firm but edgeable crust. Easy trail breaking leaving Bolton, and fun turns on the way down to Nebraska Valley. There was one large tree across the trail just north of the JK Trail turn-off. I called the CTA office and let them know.

Tour Notes and Memories:

We had a spectacular day. The only thing that would have improved it, maybe, would be a hot lunch prepared for us at the lunch rocks, and another 8" of fresh powder. But I have no complaints. It's a beautiful section of trail and one everyone who loves backcountry skiing should put on their list. Thank you CTA for helping to make this ski tour possible. I look forward to skiing it again!
